SE-IS INTENSIVE SCOURER - SPARE PARTS APPLICATION OVERVIEW

The spare parts for the Intensive Scourer SE-IS are designed to ensure effective surface cleaning, controlled abrasion, stable rotor performance, and reliable continuous operation in grain cleaning and milling plants. Key components such as rotor assemblies, beaters, bearing blocks, bearings, oil seals, drive system elements, sealing parts, covers, and connection components are precisely manufactured to support uniform material flow and consistent cleaning efficiency. Produced from high-quality steel alloys, wear-resistant rubber, precision bearings, and industrial sealing materials, these spare parts offer high resistance to abrasion, dust, vibration, and long-term operation. Sedirolu Group original spare parts are fully compatible with the Intensive Scourer SE-IS, ensuring safe, hygienic, and stable performance in flour mills, feed factories, semolina plants, corn and whole wheat flour mills, galeta mills, and grain cleaning lines.

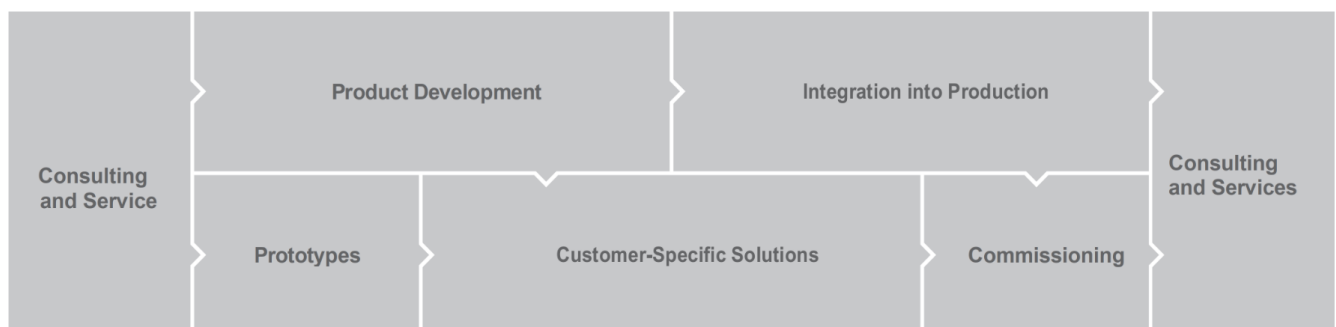

FEATURES & ADVANTAGES – SPARE PARTS

- ▶ Designed specifically for Intensive Scourer SE-IS machines to ensure perfect compatibility and reliable performance
- ▶ Manufactured from high-quality steel alloys, wear-resistant rubber components, and durable industrial-grade materials
- ▶ Reduces mechanical wear, vibration, and dust-related damage, minimizing unplanned downtime
- ▶ Improves rotor balance, drive system stability, and overall operational safety during continuous production
- ▶ Supports hygienic processing by preventing leakage of product, dust, and lubricant
- ▶ Enables easy inspection, fast replacement, and efficient maintenance for uninterrupted operation

INSTALLATION & OPERATION GUIDELINES – SPARE PARTS

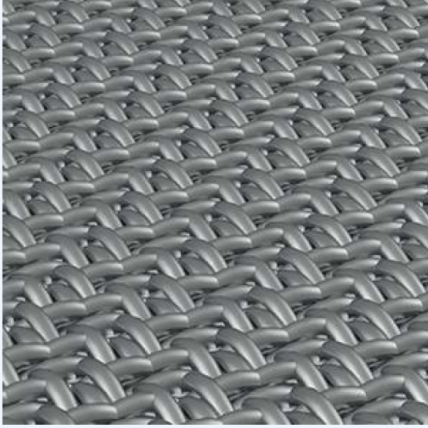

When replacing Intensive Scourer SE-IS spare parts, follow these guidelines:

- ▶ Use only original Sedirolu Group spare parts
- ▶ Confirm compatibility with the Intensive Scourer SE-IS model
- ▶ Switch off the machine and isolate all power sources before installation
- ▶ Wear appropriate personal protective equipment during replacement
- ▶ Ensure correct alignment of rotor, shaft, bearings, and drive components
- ▶ Tighten all bolts and fasteners according to technical specifications
- ▶ Check seals, covers, and safety components for proper positioning
- ▶ Keep the installation area clean and free from dust and foreign materials

SEDIROGLU GROUP DELIVERS COMPLETE SOLUTIONS ACROSS VARIOUS INDUSTRIES, COMBINING DEEP TECHNICAL EXPERTISE WITH A DIVERSE AND EXTENSIVE PRODUCT RANGE TO MEET A WIDE SPECTRUM OF CUSTOMER NEEDS.

FACING A DEVELOPMENT CHALLENGE? WE PROVIDE THE SOLUTION.
AT SEDIROGLU GROUP, OUR EXPERIENCED R&D TEAM IS COMMITTED TO CONTINUOUS IMPROVEMENT.
MANY INDUSTRY INNOVATIONS HAVE ORIGINATED FROM OUR COMPANY.
WE ARE DRIVEN BY A FORWARD-THINKING MINDSET AND A PIONEERING SPIRIT IN EVERY STEP WE TAKE.

CONTACT – WORLDWIDE

With 12 branches around the world and marketing teams in over 70 countries, we provide you with outstanding service worthy of a technology leader.

We look forward to hearing from you!
