SE-SO HORIZONTAL SCOURER - SPARE PARTS APPLICATION OVERVIEW

Spare parts for the Horizontal Scourer are specifically designed to ensure effective grain scouring, controlled surface peeling, stable rotor balance, and reliable continuous operation in grain cleaning and milling plants. Each component plays a critical role in achieving consistent husk removal, uniform friction, and vibration-free operation during high-capacity processing.

Key spare parts include cast rotor assemblies, mixing paddles, breaker plates, inner liners, wire mesh cages, feed and discharge bunkers, bearing housings, shaft locking elements, drive components, rubber sealing parts, inspection covers, hinges, latches, and vibration-resistant connection elements. All components are precisely manufactured to support controlled product movement, balanced rotation, and efficient scouring performance.
