SE-MNC MONO CYCLONE - SPARE PARTS APPLICATION OVERVIEW

Spare parts for the Mono Cyclone are specifically engineered to ensure efficient centrifugal separation, stable airflow balance, controlled discharge of granular waste, and continuous operation in aspiration and dust collection systems. Each spare part plays a critical role in preventing granular particles from reaching filtration units, protecting filter bags, and maintaining clean and balanced air circulation in industrial plants. Key spare parts include cyclone bodies, inlet and outlet flanges, cone sections, discharge connections, inspection covers, sealing gaskets, flange fasteners, and compatible rotary airlock valve components. All parts are precisely manufactured to support smooth internal airflow, effective particle separation, airtight connections, and long-term durability under continuous dust load and industrial operating conditions. Original Sediroglu Group Mono Cyclone spare parts ensure reliable performance, reduced maintenance requirements, extended equipment life, and safe operation in flour mills, semolina plants, corn flour mills, grain cleaning facilities, recycling plants, and central aspiration systems.

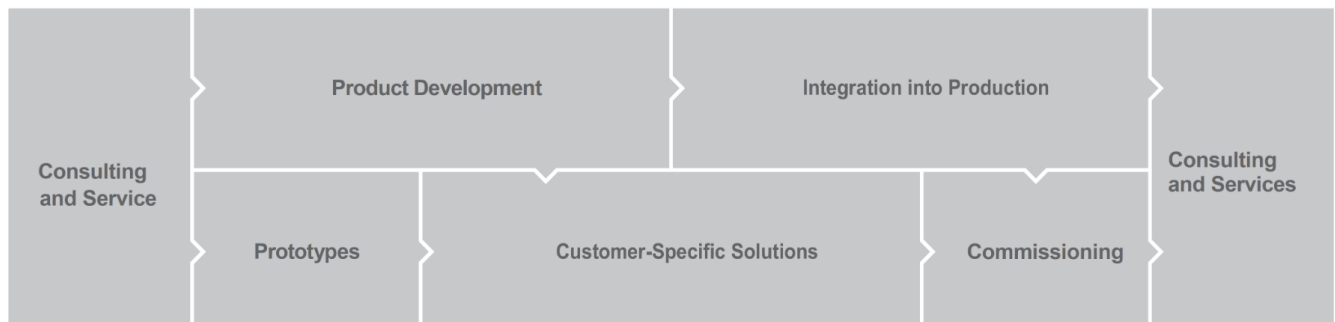

FEATURES & ADVANTAGES – SPARE PARTS

- ▶ Designed specifically for Mono Cyclone systems
- ▶ Manufactured from durable, wear-resistant materials
- ▶ Supports stable airflow and centrifugal separation
- ▶ Helps prevent dust leakage and air loss
- ▶ Reduces maintenance needs and downtime
- ▶ Easy installation and long service life

INSTALLATION & OPERATION GUIDELINES – SPARE PARTS

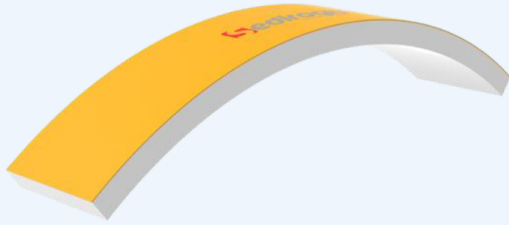

When replacing Mono Cyclone spare parts, follow these key steps:

- ▶ Use original Sediroglu Group spare parts only
- ▶ Check compatibility with the Mono Cyclone model
- ▶ Power off and isolate the system before installation
- ▶ Ensure correct flange alignment and airtight sealing
- ▶ Tighten all fasteners according to specifications
- ▶ Keep the installation area clean and dust-free
