### SE-FBC FILTER BAG CLEANING - APPLICATION OVERVIEW

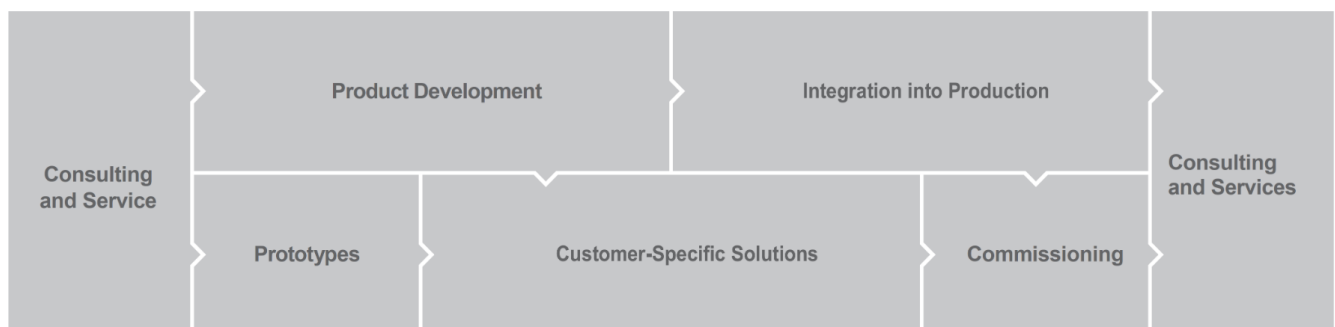

The SE-FBC Filter Bag Cleaning is a compact, high-efficiency industrial dust cleaning machine designed for environments where dust-free handling of filter bags is critical. Unlike the Filtered SE-FBF model, the SE-FBC operates without an integrated filter, making it ideal for flexible use in factory interiors or outdoors. The machine allows dust-laden materials to be collected directly into bags attached to the bottom outlet bunker. This ensures that dust and fine particles remain contained, preventing contamination in the workplace and maintaining hygienic conditions. The SE-FBC Filter Bag Cleaning system is particularly suitable for flour mills, semolina plants, pasta factories, feed factories, corn flour mills, whole wheat flour mills, and recycling facilities. Equipped with robust steel construction, ergonomic design, and easy-to-use brush and bag handling systems, the SE-FBC provides efficient cleaning of filter bags while ensuring minimal maintenance. Operators can easily place the filter bag into the outlet, manually or with simple attachments, for safe and controlled dust collection.

#### FEATURES & ADVANTAGES
