SE-VMB-B MICRO VITAMIN DOSING - SPARE PARTS APPLICATION OVERVIEW

The spare parts for the Micro Vitamin Dosing SE-VMB-B system are specifically engineered to ensure high-precision micro-ingredient dosing, stable material flow, and reliable continuous operation in flour milling and food processing plants. These components are designed to support accurate dosing performance within a wide operating range of 3 g/min to 400 g/min, maintaining consistent formulation and product quality. Critical spare parts such as precision dosing screws (augers), dual drive motors, gearboxes, speed reducers, couplings, chains, sprockets, bearings, shafts, sealed housings, bunker components, internal mixing paddles, level sensors, PLC control units, electrical panels, and pneumatic elements are manufactured to guarantee exact volumetric dosing and homogeneous micro-ingredient distribution. Each original Sediroglu Group spare part is fully compatible with all Micro Vitamin Dosing SE-VMB-B configurations. These components ensure hygienic operation, stable screw feeding, precise automation control, reduced mechanical wear, and full compliance with modern food safety and industrial production standards.

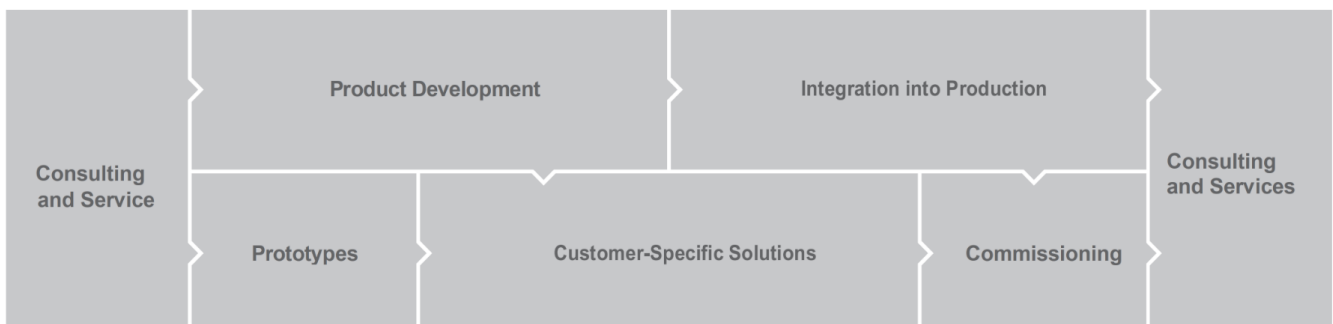

FEATURES & ADVANTAGES – SPARE PARTS

- ▶ Specifically designed for Micro Vitamin Dosing SE-VMB-B systems
- ▶ Supports precise dosing between 3-400 g/min
- ▶ Compatible with speed-controlled (frequency inverter) operation
- ▶ Manufactured from food-grade, wear-resistant industrial materials
- ▶ Ensures stable and continuous micro-ingredient feeding
- ▶ Reduces dosing deviation and mechanical stress
- ▶ Minimizes unplanned downtime and improves production continuity

INSTALLATION & OPERATION GUIDELINES – SPARE PARTS

When replacing Micro Vitamin Dosing SE-VMB-B spare parts, follow these guidelines:

- ▶ Use only original Sediroglu Group spare parts
- ▶ Confirm compatibility with the SE-VMB-B model and required dosing capacity
- ▶ Completely stop the machine and disconnect electrical power before maintenance
- ▶ Ensure the speed drive (frequency inverter) is fully powered off before servicing electrical components
- ▶ Use appropriate personal protective equipment during installation
- ▶ Ensure correct alignment of dosing screws (augers), shafts, and drive motor assemblies
- ▶ Adjust and secure speed-controlled motor connections according to technical specifications
- ▶ Calibrate dosing rate via speed drive settings after installation

SEDIROGLU GROUP DELIVERS COMPLETE SOLUTIONS ACROSS VARIOUS INDUSTRIES, COMBINING DEEP TECHNICAL EXPERTISE WITH A DIVERSE AND EXTENSIVE PRODUCT RANGE TO MEET A WIDE SPECTRUM OF CUSTOMER NEEDS.

FACING A DEVELOPMENT CHALLENGE? WE PROVIDE THE SOLUTION.
AT SEDIROGLU GROUP, OUR EXPERIENCED R&D TEAM IS COMMITTED TO CONTINUOUS IMPROVEMENT.
MANY INDUSTRY INNOVATIONS HAVE ORIGINATED FROM OUR COMPANY.
WE ARE DRIVEN BY A FORWARD-THINKING MINDSET AND A PIONEERING SPIRIT IN EVERY STEP WE TAKE.

CONTACT – WORLDWIDE

With 12 branches around the world and marketing teams in over 70 countries, we provide you with outstanding service worthy of a technology leader.

We look forward to hearing from you!
