SE-MESH SIEVE MESH SILK SERIES - SPARE PARTS APPLICATION OVERVIEW

The Sieve Mesh Silk Series Spare Parts are specifically designed for industrial sifting and classification systems used in flour, semolina, and grain processing plants. These high-precision silk mesh replacement components ensure stable screening performance, accurate particle separation, and consistent product quality across multiple sifter configurations. Compatible with Small Plansifter Twin, Control Sifter 2-Passage, Two Channel Sifter, Control Mono Sifter, Single Channel Sifter, Control Sifter, Plansifter, and Quadro Plansifter systems, these spare parts play a critical role in maintaining optimal sieving efficiency and uniform product flow. Manufactured in various micron and mesh sizes, the silk screens are engineered to provide precise separation accuracy while maintaining high air permeability and mechanical strength. Their durable structure supports long operational life under continuous industrial use, reducing downtime and ensuring stable flour classification performance. Each mesh component contributes directly to product consistency by preventing contamination, minimizing clogging, and ensuring efficient screening of flour fractions. Properly selected and maintained sieve mesh silk parts are essential for maintaining extraction balance, particle size distribution accuracy, and overall milling process stability.

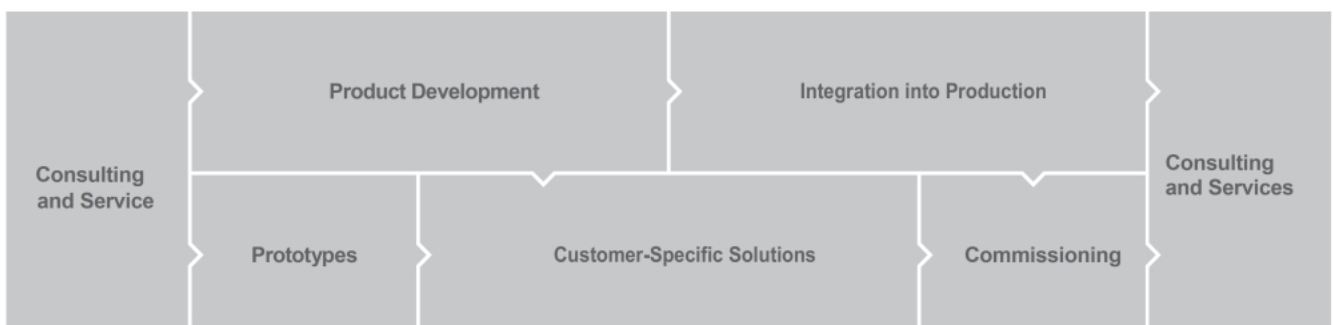

FEATURES & ADVANTAGES – SPARE PARTS

- ▶ Designed for industrial plansifter and control sifter systems
- ▶ Ensures precise and consistent particle size separation
- ▶ Available in multiple micron and mesh configurations
- ▶ High durability and wear resistance for continuous operation
- ▶ Supports stable airflow and efficient screening performance
- ▶ Reduces clogging and improves product flow stability
- ▶ Enhances flour classification accuracy and extraction balance
- ▶ Minimizes downtime and maintenance frequency

INSTALLATION & OPERATION GUIDELINES – SPARE PARTS

When replacing Sieve Mesh Silk Series spare parts, follow these guidelines:

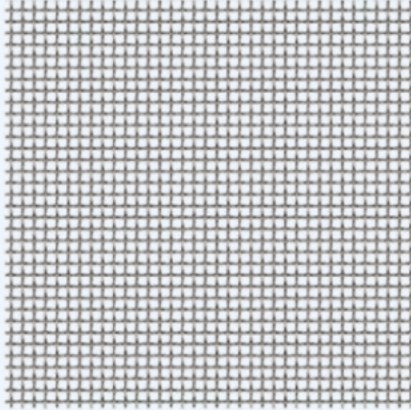

- ▶ Verify correct mesh size and micron specification for the application
- ▶ Ensure full compatibility with the specific sifter model
- ▶ Stop the machine completely before installation
- ▶ Clean sieve frames and support surfaces before mounting
- ▶ Secure mesh evenly to avoid tension imbalance
- ▶ Check frame alignment and sealing components after installation
- ▶ Perform test run to confirm stable screening performance

SEDIROGLU GROUP DELIVERS COMPLETE SOLUTIONS ACROSS VARIOUS INDUSTRIES, COMBINING DEEP TECHNICAL EXPERTISE WITH A DIVERSE AND EXTENSIVE PRODUCT RANGE TO MEET A WIDE SPECTRUM OF CUSTOMER NEEDS.

FACING A DEVELOPMENT CHALLENGE? WE PROVIDE THE SOLUTION.
AT SEDIROGLU GROUP, OUR EXPERIENCED R&D TEAM IS COMMITTED TO CONTINUOUS IMPROVEMENT.
MANY INDUSTRY INNOVATIONS HAVE ORIGINATED FROM OUR COMPANY.
WE ARE DRIVEN BY A FORWARD-THINKING MINDSET AND A PIONEERING SPIRIT IN EVERY STEP WE TAKE.

CONTACT – WORLDWIDE

With 12 branches around the world and marketing teams in over 70 countries, we provide you with outstanding service worthy of a technology leader.

We look forward to hearing from you!
