FLOW PIPES SERIES - CHROME- APPLICATION OVERVIEW

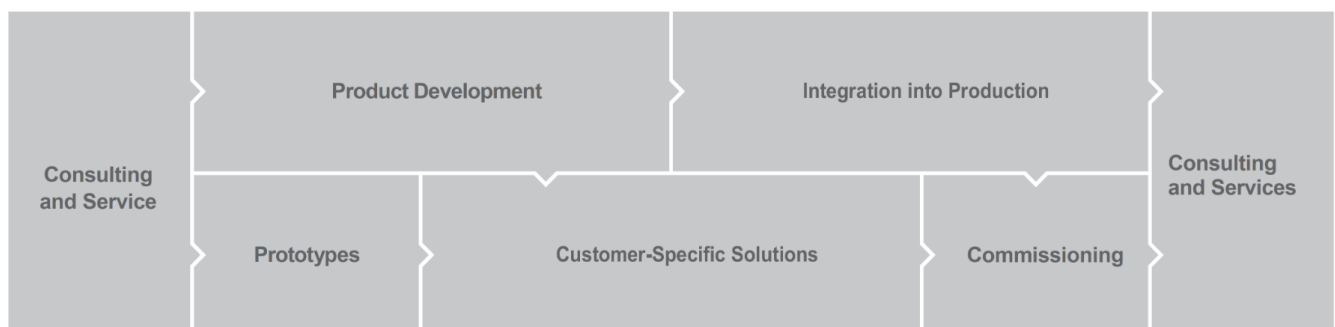

Chrome Flow Pipes are engineered to provide hygienic, smooth, and reliable material transfer throughout flour milling and food processing facilities. Designed for efficient conveying of flour, semolina, bran, and intermediate products, these pipes ensure uninterrupted flow across cleaning, conveying, grinding, and packaging sections of the plant. Manufactured from AISI 304 quality chrome steel, they offer excellent corrosion resistance, food safety compliance, and long service life. Their smooth inner surface minimizes product buildup and friction, supporting gentle material handling and consistent process performance. Chrome Flow Pipes are an ideal solution for modern flour mills, feed plants, whole wheat mills, corn flour mills, breadcrumb production lines, and pasta factories where cleanliness, durability, and process efficiency are critical.

FEATURES & ADVANTAGES

- ▶ Manufactured from AISI 304 quality chrome steel for food-grade applications
- ▶ Smooth inner surface for uninterrupted and efficient material flow
- ▶ High corrosion and wear resistance for long service life
- ▶ Hygienic design compliant with food industry standards
- ▶ Reduces product residue, dust formation, and contamination risk
- ▶ Suitable for pneumatic and gravity conveying systems
- ▶ Easy installation and maintenance
- ▶ Supports stable, clean, and efficient plant operation

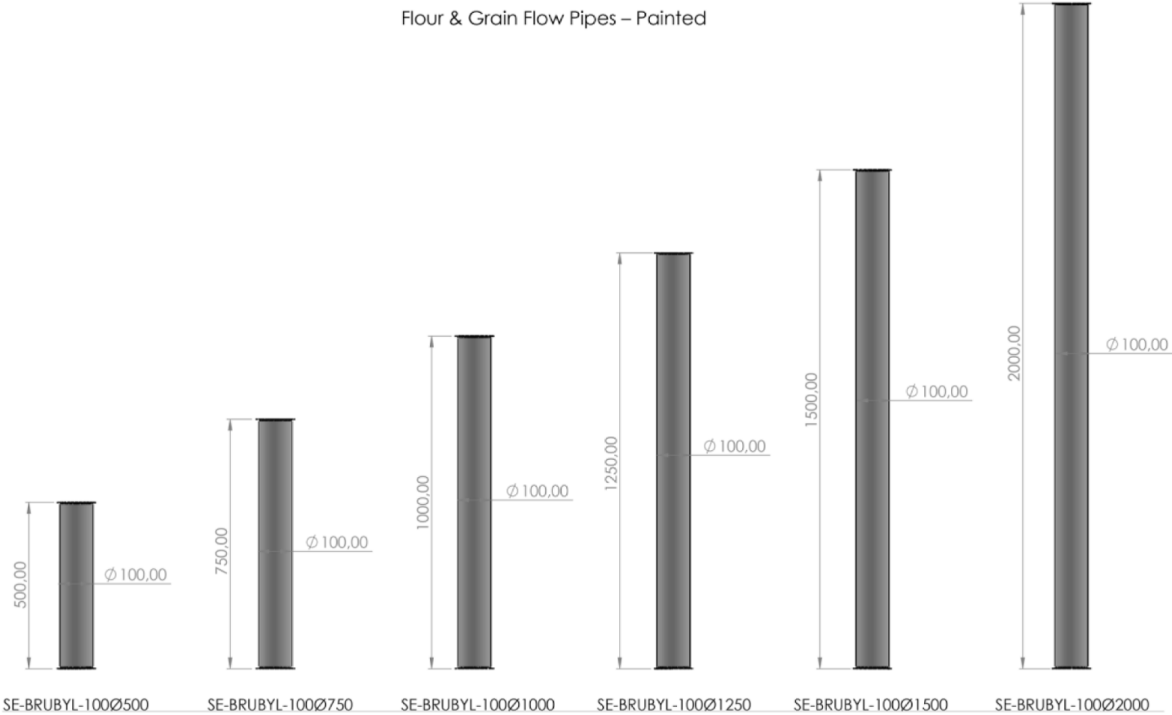

APPLICATION FIELDS

- ▶ Flour milling plants (cleaning, conveying, grinding, and packaging sections)
- ▶ Feed production plants
- ▶ Whole wheat flour mills
- ▶ Corn flour mills
- ▶ Breadcrumb production facilities
- ▶ Pasta production plants
- ▶ Food processing and packaging plants
- ▶ Cereal handling and conveying systems
