FLOW PIPES SERIES - PAINTED- APPLICATION OVERVIEW

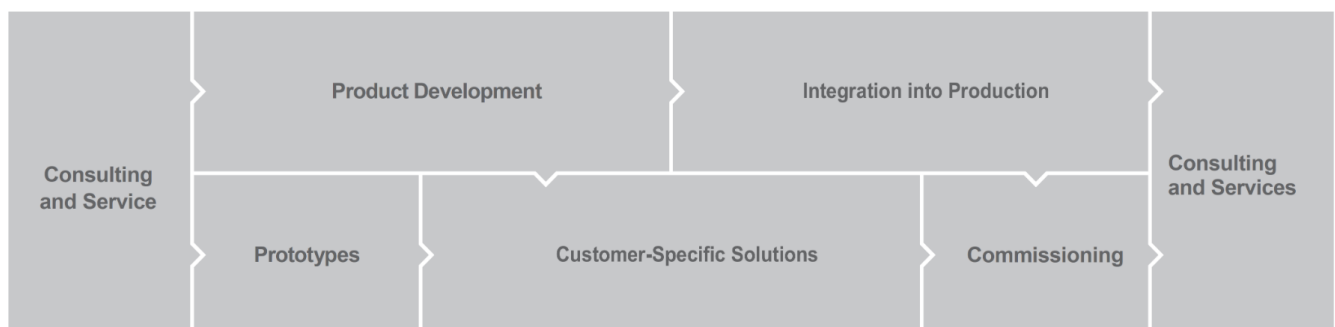

Painted Flow Pipes are designed to provide durable, efficient, and cost-effective material conveying solutions for flour milling and food processing facilities. Engineered for the transport of flour, semolina, bran, and intermediate products, these pipes support stable flow throughout cleaning, conveying, grinding, and packaging sections of the plant. Manufactured from high-quality steel with a protective industrial paint coating, they offer strong resistance against abrasion, external corrosion, and mechanical impact. The coated surface helps reduce material adhesion and protects the pipe structure, ensuring reliable operation and extended service life. Painted Flow Pipes are a practical choice for flour mills, feed plants, whole wheat mills, corn flour mills, breadcrumb production lines, and pasta factories where robust construction and efficient material transfer are essential.

FEATURES & ADVANTAGES

- ▶ Manufactured from high-quality carbon steel with durable industrial paint coating
- ▶ Smooth inner surface for uninterrupted and efficient material flow
- ▶ High corrosion and wear resistance for long service life
- ▶ Hygienic design compliant with food industry standards
- ▶ Reduces product residue, dust formation, and contamination risk
- ▶ Suitable for pneumatic and gravity conveying systems
- ▶ Easy installation and maintenance
- ▶ Supports stable, clean, and efficient plant operation

APPLICATION FIELDS

- ▶ Flour milling plants (cleaning, conveying, grinding, and packaging sections)
- ▶ Feed production plants
- ▶ Whole wheat flour mills
- ▶ Corn flour mills
- ▶ Breadcrumb production facilities
- ▶ Pasta production plants
- ▶ Food processing and packaging plants
- ▶ Cereal handling and conveying systems
