### APPLICATION OVERVIEW - ALL MODELS OF FLOW PIPES SERIES (PAINTED)

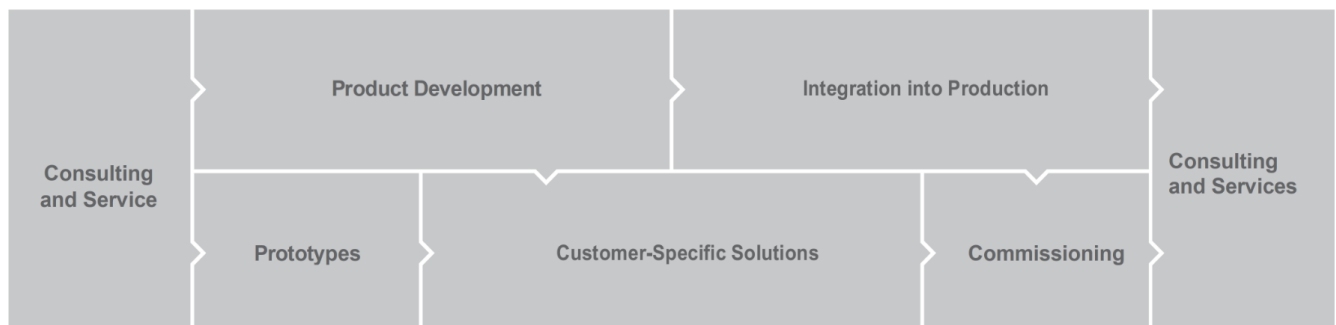

Painted Flow Pipes are designed to provide durable, smooth, and reliable material conveying in flour milling and food processing facilities. Engineered for the efficient transfer of flour, semolina, bran, and intermediate products, these pipes support continuous flow across cleaning, conveying, grinding, and packaging sections. Manufactured from high-quality steel with a protective industrial paint coating, they offer strong resistance to external corrosion, abrasion, and mechanical impact. The coated inner surface helps reduce material adhesion and supports stable conveying performance. Painted Flow Pipes present a cost-effective and dependable solution for flour mills, feed plants, whole wheat and corn flour mills, breadcrumb production lines, and pasta factories where robustness, efficiency, and operational continuity are essential.

#### FEATURES & ADVANTAGES

- ▶ Constructed from high-strength steel with protective paint finish
- ▶ Smooth inner surface for uninterrupted and efficient material flow
- ▶ High corrosion and wear resistance for long service life
- ▶ Hygienic design compliant with food industry standards
- ▶ Reduces product residue, dust formation, and contamination risk
- ▶ Suitable for pneumatic and gravity conveying systems
- ▶ Easy installation and maintenance
- ▶ Supports stable, clean, and efficient plant operation

#### APPLICATION FIELDS

- ▶ Flour milling plants (cleaning, conveying, grinding, and packaging sections)
- ▶ Feed production plants
- ▶ Whole wheat flour mills
- ▶ Corn flour mills
- ▶ Breadcrumb production facilities
- ▶ Pasta production plants
- ▶ Food processing and packaging plants
- ▶ Cereal handling and conveying systems
